These are estimated dates. Length of season(s) may be shortened or extended depending on project needs, funding, or factors beyond the project’s control.

Job Description: The employees in these positions will conduct stream habitat, juvenile snorkel, and/or electroshocking surveys in Oregon streams. Duties include:

* Describing channel morphology and instream habitat characteristics.
* Assessing distribution and abundance of juvenile fish. * Keeping accurate and clear data records.
* Working in hot, cold, rainy weather and over rough terrain. * Hiking into and along streams daily.
* Occasional camping or backpacking in remote areas.
* Communicating with the public to gain access to private land and to explain monitoring activities.

These positions require a flexible work schedule that varies in the number of hours worked on a daily basis, but not necessarily each day, or a work schedule in which the starting and stopping times vary on a daily basis, but not necessarily each day including most weekends and some night work. These positions may be physically demanding.
